IMPORTANT NOTES FOR ALL BIDDERS

WE WOULD EXPECT THAT THE WISE BUYER WILL SUBMIT NUMEROUS BIDS, ALL AT LEVELS COMMENSURATING WITH HIS/HER IDEA OF THE VALUE OF EACH LOT. ON THE ITEMS THAT HE REALLY WANTS BADLY, THE SERIOUS BIDDER WILL BID WELL ABOVE THE TOP ESTIMATE, RECOGNIZING THAT HIS BID WILL BE REDUCED AS PER PARAGRAPH NUMBER 2 OF THE TERMS OF SALE, BUT ALSO REALIZING THAT HE MIGHT BE IN COMPETITION WITH OTHER SERIOUSLY INTERESTED BIDDERS.

IN THOSE SECTIONS WHICH SHOW A PRICE RANGE FOR AN ESTIMATE, THE LOW FIGURE REPRESENTS ROUGHLY WHOLESALE EVALUATION WHILE THE HIGH FIGURES INDICATE WHAT A SERIOUS SPECIALIST MAY PAY FOR THE LOT. BIDS LESS THAN THE LOWER FIGURES WILL SOMETIMES SUCCEED; BIDS NEAR AND ABOVE THE HIGHEST FIGURE WILL MOST LIKELY BE SUCCESSFUL AND BE REDUCED AS OUTLINED IN PARAGRAPH NUMBER 2 OF THE TERMS OF SALE. (OF COURSE, ALL BIDS ARE SUBJECT TO REDUCTION).

IN THOSE SECTIONS WHERE ONLY ONE ESTIMATE IS GIVEN WITH A PLUS MARK, THIS ESTIMATE REPRESENTS WHAT WE BELIEVE TO BE A FAIR WHOLESALE PRICE. GENERALLY SPEAKING, OUR ESTIMATE SHOULD SERVE AS A USEFUL GUIDE. BUT, BIDDERS SHOULD USE THEIR OWN KNOWLEDGE AND EXPERIENCE AS THE FINAL TOOL TO DETERMINE THEIR BIDS.

WE MAKE THE FOLLOWING SUGGESTIONS TO ALL BIDDERS:

- 1) BID WHAT YOU WISH ON EACH ITEM, BUT KEEP THE ESTIMATE AND RESERVE PRICES IN MIND LEST YOU WASTE YOUR OPPORTUNITY TO ACQUIRE AN ITEM YOU PARTICULARLY DESIRE.
- 2) COINS ARE NOT LIKE POSTAGE STAMPS WHICH ARE OVERPRICED IN CATALOGS. COINS ARE MORE REALISTICALLY EVALUATED IN THE STANDARD CATALOGS AND IN MANY CASES WILL BRING CONSIDERABLY ABOVE CATALOG VALUE.
- 3) RECENT CATALOGS REFLECT VERY LOW PRICES FOR THE LESS RARE SILVER COINS. THIS IS BECAUSE MANY PRICES WERE FIXED WHEN SILVER OSCILLATED BETWEEN \$5 AND \$7. ALSO, WHEN SILVER PRICES PEAKED, A GOOD MANY OF THESE SO-CALLED COMMON COINS WERE MELTED AND THEIR AVAILABILITY IS LESS THAN SUSPECTED.
- 4) IN THE CASE OF PRECIOUS METALS SUCH AS GOLD AND SILVER, ALWAYS BID ABOVE THEIR METALLIC CONTENT NO MATTER HOW COMMON THE COINS MAY BE, AS NO ONE CAN EXPECT TO OBTAIN COINS BELOW THEIR METALLIC CONTENT.
- 5) BID THE MAXIMUM BID YOU WILL PAY FOR THE LOT, RECOGNIZING THAT IF YOUR BID IS HIGH, RELATIVE TO OTHER BIDS, YOUR BID WILL BE REDUCED IN ACCORDANCE WITH PARAGRAPH 2 OF THE TERMS OF SALE.

REQUESTS FOR ADDITIONAL INFORMATION, CONFIRMATION OF THE GRADE, DATE, MINTMARK ETC. OF ANY PARTICULAR ITEM OR ANY INDIVIDUAL QUESTIONS ARE WELCOME AND WILL BE ANSWERED AS PROMPTLY AS POSSIBLE.

IN THE CASE OF MATERIAL PHOTOGRAPHED IN THE PLATE SECTION, SHOULD ANY SUCCESSFUL BIDDER WISH TO OBTAIN THE ORIGINAL PHOTO FOR RECORD-KEEPING AND IN CASE OF LOSS, ETC., WE WILL GLADLY PROVIDE THE CUSTOMER WITH THE PHOTO AT A \$2 HANDLING CHARGE PER COIN (IF ONLY ONE SIDE IS PHOTOGRAPHED ONLY ONE PHOTO WILL BE FURNISHED. PHOTOGRAPH OF THE ADDITIONAL SIDE IS AVAILABLE AT AN ADDITIONAL CHARGE OF ONLY \$2). PHOTOGRAPHS OF COINS NOT PHOTOGRAPHED IN THE PLATE SECTION MAY BE ORDERED AT \$3 INCLUDING OBTVERSE AND REVERSE. REQUESTS FOR PHOTOGRAPHS SHOULD BE MADE AT THE TIME YOUR BIDS ARE PLACED.

- *068.1 -FR--, 200 Pesos, Gold Pattern 1977. This coin commemorates the 100th anniversary of the discovery of Columbus remains (now in a church in Santo Domingo). Only 20 of these coins were issued, this is number 17 (engraved in rim). Coin 900 gold, 31.1 gram. PROOF2000-3000

Regarding the above coin, we feel this to be a very rare and interesting piece of a commemorative nature considered to be of great importance especially with the coming of the 500th anniversary of the Americas. It is interesting to note that of the rare Paraguay 10,000 Guaranies, of STROESSNER but (see Y30), of which 350 are said to be in struck (but from sources we have it that only were struck) are never offered in the UNITED STATES market. Price of 10,000 Guaranies is also too low in KRAUSE.

This might be very well the case of the Dominican coin and it can very well represent a once in a lifetime opportunity to the collector.

- *075.1 -HONDURAS- Y28, 5 Pesos, 1889. This coin is of a Rare type but also significant because of the fact that it is listed as reported but unconfirmed in Krause and also in the Stickney, Almanzar "THE COINAGE OF PAPER MONEY OF HONDURAS" catalog and we have of course not seen any other offers in past auctions. This coin shows signs of weakness in rim which is indicative that it may have been mounted at one time. It also shows a minor test mark in the rim (only just visible in the reverse at 8 o'clock), however, other than surface pittings the coin remains About VF for wear. Due to its rarity as a type it will due as a type coin and due to its rarity as a date it should be quite desirable for the specialized collector. For the moment we will only estimate at 2000+

- *081 -FR43, KM159, 8 Escudos, 1805(TH), struck in platinum with thin layer of gold plating. Definately mint struck with traces of the platinum white showing through the gold.

It was common practice in those days to replace the use of gold for platinum was at that time cheaper. his derived more profit for the mint. As a result, although rarely found, some platinum strikes do turn up from time to time. The cataloguer has in fact only seen on previous specimen of another date.

Missing in Fuch's PLATINUM COINS OF THE WORLD therefore, might be unique?? In EF for wear with very minor traces of adjustment marks in the reverse field. The owner's expectation is very reasonable at 3000-4000

Harris; as of recent, in 1977 it was missing in HANK's 'COMPREHENSIVE CATALOG' and 'ENCYCLOPEDIA OF REPUBLIC MEXICAN COINS'. It was actually unlisted in "The Standard Catalog of Mexican Coins" by Bruce and Vogt, and finally surfaced in the very latest Editions of KRAUSE. THE COIN HEREBY OFFERED is Splendid...no less than Uncirculated condition, impaired only by some weakness in the strike, visible in the Obverse eagle and the Reverse balance scale. Letters from pleased customers...

Dear Sir:

Pleased to be successful on one bid much less two bids. I am really impressed with Almanzar's in all ways possible for a customer to be impressed with a coin dealer.

Your fine outfit will get my auction bids and purchased whenever possible in the future. I was in San Antonio and visited the 'Alamo' in 1962. My next visit will also include the "Almanzar Coins of the World Inc., Shop".

Respectfully Yours, F.G.H.
CINCINNATI, OHIO

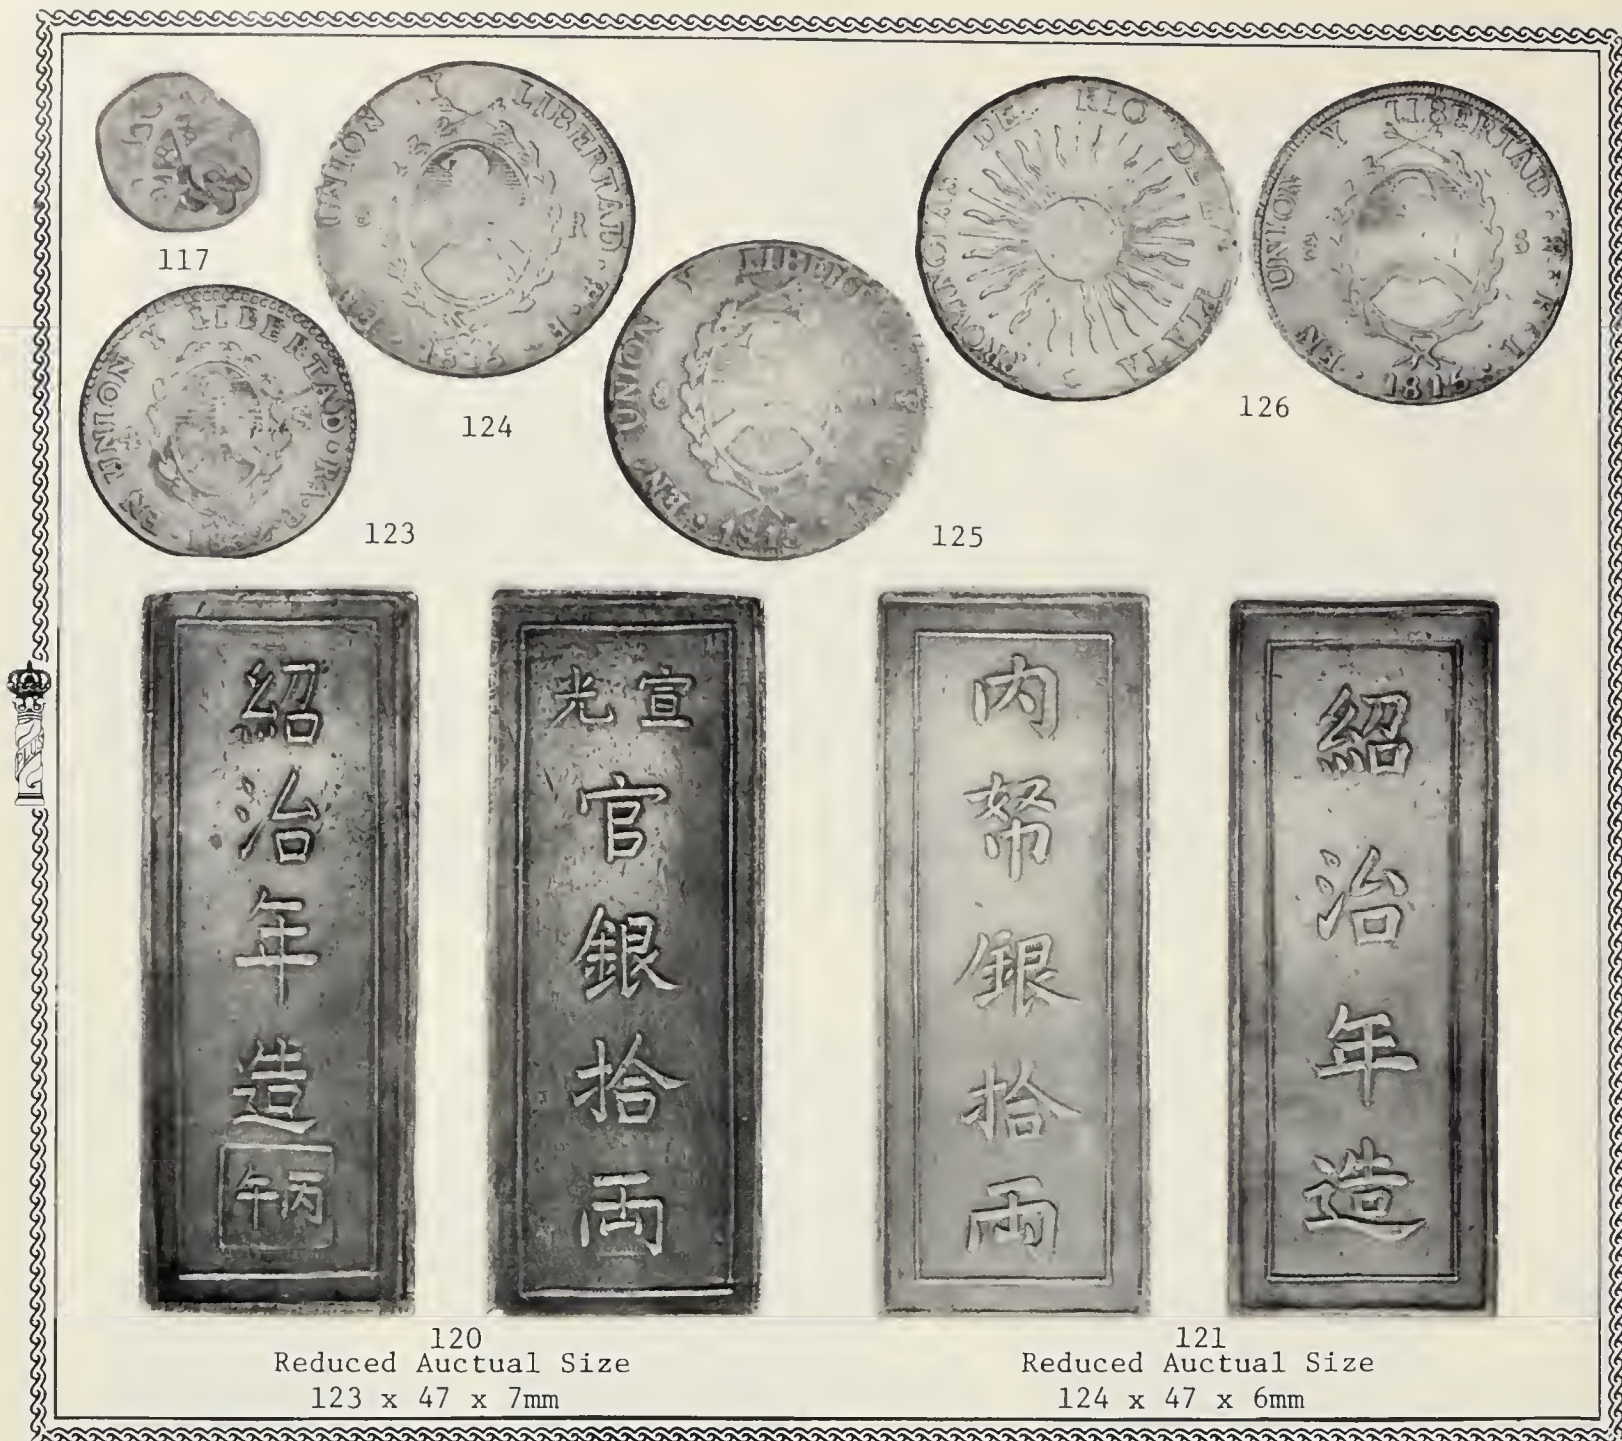

Thanks for the Prompt Service --- always enjoy your catalogues --- and the great variety that you present.

R.R.
OKMULGEE, OKLAHOMA

Dear Al:

I'd like to say I think your auctions are terrific in light of all the material offered. I still need over 6,000 coins for my collections and over half of these, even though high in grade, are under \$20 each(as per KM values). Hope you continue expanding your Budget Section, so we can find those "ELUSTIVE" types and dates.

Sincerely, R.G.P.

*466 -CHINA[SYCEE(INGOTS)]- Boat shape money or Sycee, 50 Taels (1850) with several bank stamps showing different descriptions. VF, very reasonably estimated by the owner at 800-1200

The above coin is an interesting form of primitive money and a similar piece was offered as lot #75 by Hans M.F. Schulman in his specialized "PRIMITIVE MONEY" (Odd and Curious Money) cataloged from the Gibbs collection 1967-1968 it was then #708, also Ex-Farouk #2593.

Prior to 1889 the only coinage issued by the Chinese government was the brass cash coin. Despite occasional shortlived experiments with silver and gold coinage, and disregarding paper money which tended to be unreliable, the government expected the people to get by solely with cash coins. This system worked well for individuals making purchases for themselves, but was unsatisfactory for trade and large business transactions, since a dollar's worth of cash coins weighed about four pounds. As a result, a private currency consisting of silver ingots crudely stamped by the firm which made them came into use. These were the sycee ingots.

It is not known when these ingots first came into use. Some sources date them to the Yuan(MONGOL)dynasty, but they are certainly much older. Examples are known from as far back as the Han dynasty (206 BC - 220 AD) but prior to the Sung era (960 - 1280 AD) they were used mainly for hoarding wealth. The development of commerce by the Sung dynasty, however, required the use of silver or gold to pay for large purchases. By the Mongol period(1280-1368) silver ingots and paper money had become the dominant currencies, especially for trade. The western explorers who traveled to China during this period (such as Marco Polo), mention both paper money and sycee but not a single one refers to cash coins.

During the Ming dynasty (1368-1644) trade fell off and the use of silver decreased. But towards the end of that dynasty, Dutch and British ships began a new China trade and sycee once again became common. During the 19th and early 20th centuries, the trade in sycee became enormous. Most of the sycee around today are from this period. In 1935 the Chinese government banned the use of sycee and it soon disappeared.

The word sycee(pronounced "sigh - see") is a western corruption of the Chinese words hsi ssu("fine silk") or sai ssu("fine silver") and is first known to have appeared in the English language in the late 1600's. By the early 1700's the word appeared regularly in the records of the British East India Company. Westerners also called these ingots "boat money" or "shoe money" due to the fact that the most common type of ingot resembles a Chinese shoe. The Chinese, however, called the ingots by a variety of names, the most common of which were yuan pao, wen yin and yin ting.

The ingots were cast in molds (giving them their characteristic shapes) and while the metal was still semi-liquid, the inscription was impressed. It was due to this procedure that the sides of some sycee are higher than the center. The manufacturers were usually silver firms, often referred to as lu fang's, and after the sycee was finished it was tested and marked by the kung ku (public assayer).

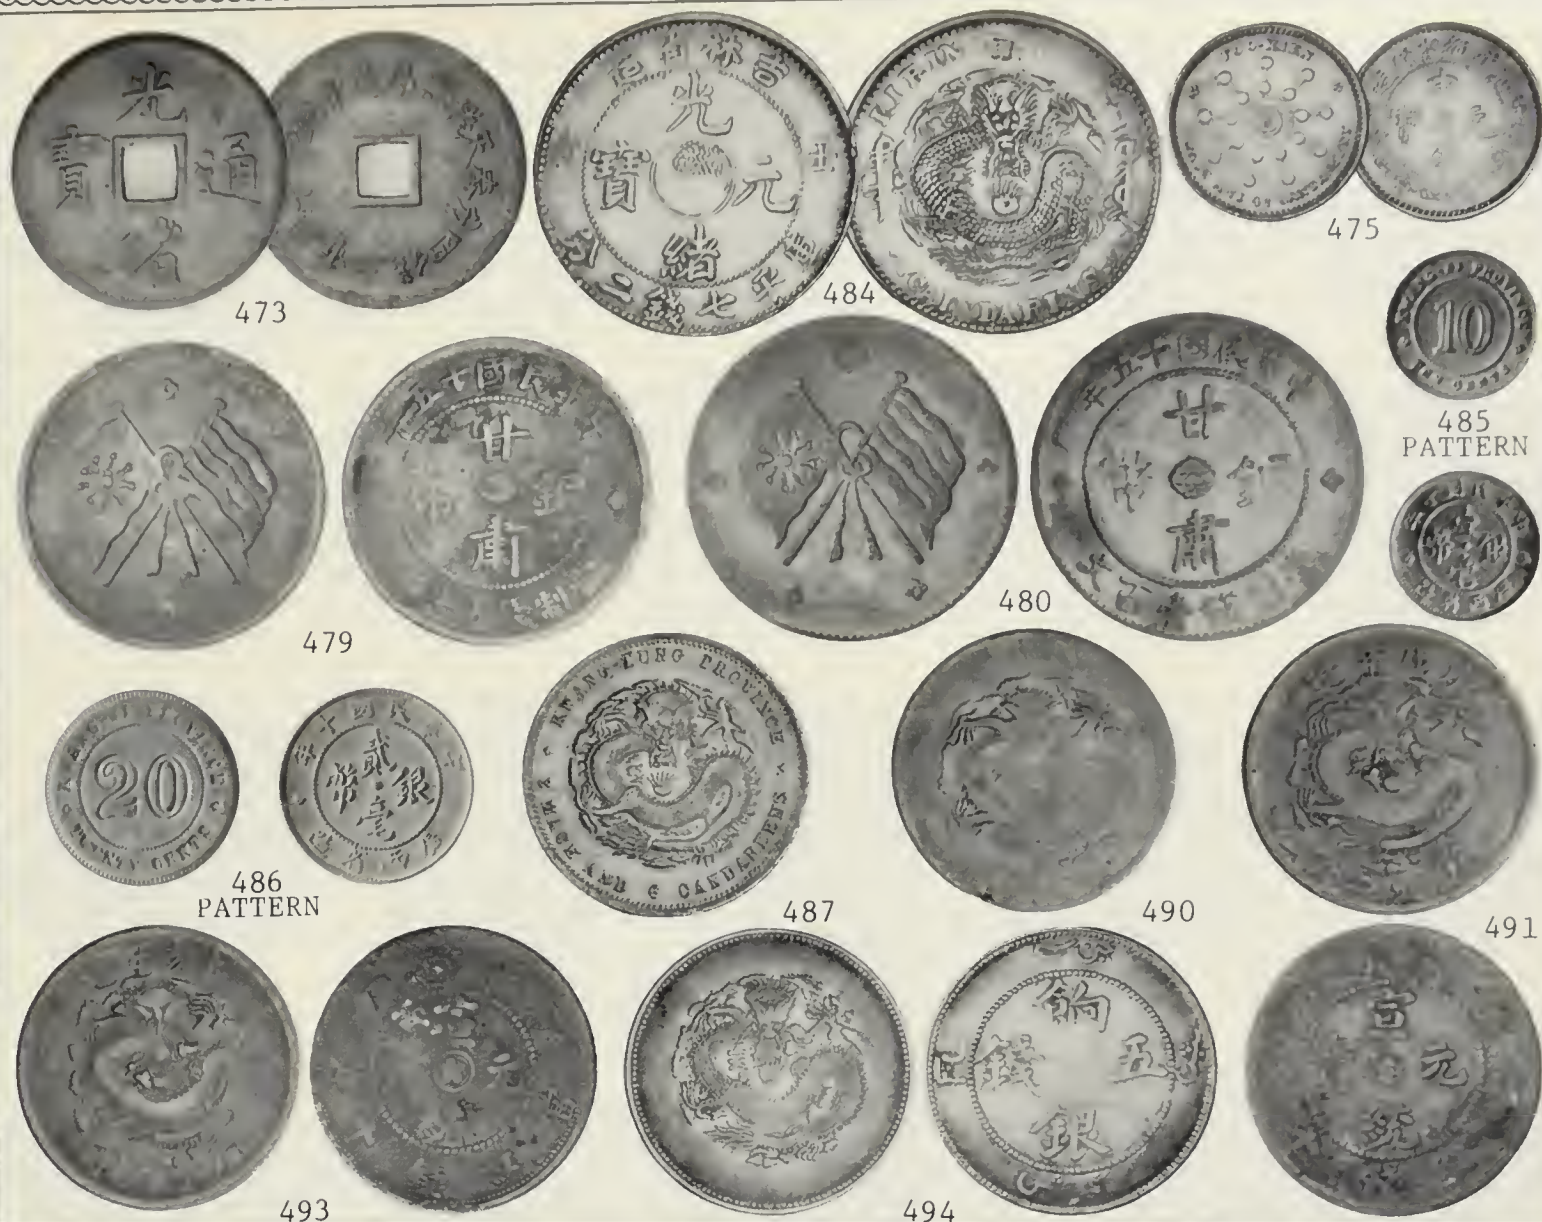

Sycee were not circulated as we understand it. One didn't usually carry a sycee to market and spend it. Usually the ingots were used as a means of carrying a large amount of money on trips (as we would carry \$100 bills instead of \$5 bills) or for storing wealth. Large transactions between merchants or banks were paid by means of crates of sycee - each containing 60 fifty tael ingots.

Sycee are known in a variety of shapes the most common of which are the shoe or boat shaped, drum shaped, and loaf shaped(rectangular or hourglass-shaped, with a generally flat surface). Other shapes include one that resembles a double headed axe (this is the oldest type known), one that is square and flat and others that are "fancy" (in the form of fish, butterflies, leaves, etc.,).

Sycee have no denominations as they were simply ingots that passed by weight. Most are in more or less standard weights, however, the most common being 1, 5, 10 and 50 taels. Other weights known include 1/10, 1/5, 1/4, 1/3, 1/2, 2/3, 72/100 (this is the weight of a dollar), 3/4, 2, 3, 4, 6, 7 and 8 taels. Most of the pieces weighing less than 5 taels were used as gifts or souvenirs.

The actual weight of any given value of sycee varied considerably due to the fact that the tael was not a single weight but a general term for a wide range of local weight standards. The weight of the tael varied depending upon location and type of tael in question. For example in one town, the weight of a tael of rice, of silver and of stones may each be different. In addition, the fineness of silver also varied depending upon location and type of tael in question.

One need only see KRAUSE Catalog, where a very weakly struck worn specimen was the only coin available for reproduction to realize the rarity of the Type; In addition to this coin being well struck, it has very little wear. An important addition to a "4 Reales and 1/2 Dollars Collection of Latin America" or to a collector of Bolivar bust coinage (which there are several) for the specialist of Ecuador coinage or for just anyone that appreciates and can afford a truly rare coin for pleasure as well as investment. <p>NEW PERU BOOK A STUDY OF THE SOLES OF PERU (1864-1916) by William M. Judd--Perhaps one of the most interesting numismatic series of Latin American Coins, are the "SOLES OF PERU" now featured in a "20-Page Format", and divided into (14) fourteen types by the author (KRAUSE divides the series into (13) types). Each type is widely described and although the quality of photographs is not as good as it can be expected, there are drawings which readably indicates the position of where the initials can be located (this alone can be quite difficult for the Beginner).</p> <p>We always recommend the book, before the coin and this catalog we suggest as an interesting edition for anyone connected with World Numismatics or at least those with interests in Latin American Coins as everyone is likely to turn up some coins of this series and would like to catalog them. The book may be ordered from us at \$4.50.</p> <p>OFFERING OF PERU SOLES We are HEREBY OFFERING an extensive selection of "Peru Soles" from the "Castillo Collection" which is now offered in it's Part XIII. We have been perhaps, the dealers that have made the most extensive offers of "Peru Soles" in the United States, and have been studying this series for quite some time, so we have offered in the past some varieties not cited in this catalog; Also as we were cataloging this group of coins, we encountered yet further important varieties; many of which are HEREBY OFFERED, or will be offered in the future.</p> <p>At this point, it is very difficult to ascertain just how rare a variety can be. I know of no excessive prices being asked for certain varieties of this coin. I would have to guess that as more research is done in the field and more collectors become interested (especially now, that this new catalog has published) we can expect an increase in prices.</p> <p>AS WE LIST THESE COINS---We will assign the KRAUSE types with "Y" numbers as well as JUDD's type edition and his numbers. Minor varieties will simply be listed by giving a Judd number and adding the word "variety".</p>

23 YEARS OF PROFESSIONALITY, NOT AN EARTH SHATTERING FACT, YET QUITE REMARKABLE IN MANY WAYS. We have, because of design during that time span, grown at a measured pace without falling prey to the super-hyped bullion market mentality. In more precise language, rather than practicing how to be good at being "too big for our britches", we have paced our efforts at learning how to be best at being effective. OUR expertise and energies — both of which are considerable — are directed, without diversion, to what we do best.

We are hereby offering our first Budget Paper Money section of lots mostly in the \$10-15 bracket. This will offer you an opportunity to search for those elusive notes which are offered in a format with cost-saving in mind - some abbreviations are being used and verbal niceties have been deleted.

- Not many medals directly referring to the events of the Revolutionary War have an English Origin, and the resources of the struggling Colonies did not often permit them to honor the gallant deeds of their leaders by numismatic monuments before their independence was attained. Such as were struck by order of the Continental Congress were engraved abroad. Yet the sympathy for the cause of America, and the resentment which was generally felt at the course of Great Britain, made itself manifest by several medals issued on the Continent, and especially in Holland, where a number of historic interest to American Collectors were struck. It was for this reason that the medal described above was included in Betts, under the heading "The Period of the Revolutionary War" and also in Medina and Fonrobert's North America edition.
